**In the Claims:**

Please cancel without prejudice claims 1-13 and 27-53. Claims 14-26 stand allowed. There are no amendments included herein.

1-13.(canceled)

14.(original) A toy comprising:

a generally spherical translucent housing having an inner cavity and at least one opening positioned to provide an outlet from said inner cavity, the housing comprising a fluorescent composition responsive to UV light;

a power source positioned within said housing;

an electrical circuit connected to said power source;

a light source connected to said power source through said electrical circuit, said light source capable of generating sufficient UV light for exciting the fluorescent composition to fluoresce; and

a switch connected in said electrical circuit, wherein said switch is automatically responsive to movement of said toy.

15.(original) The toy of claim 14, wherein said housing further comprises a plurality of openings positioned to provide outlets from said inner cavity.

16.(original) The toy of claim 14, wherein said housing comprises two parts separable from each other to thereby provide access to the inner cavity.

---

17.(original) The toy of claim 14, wherein the inner cavity in said housing is divided into at least first and second compartments.

18.(original) The toy of claim 17, wherein said at least one opening provides an outlet from said first compartment.

19.(original) The toy of claim 17, wherein said second compartment is substantially waterproof and houses said power source, electrical circuit, and light source.

20.(original) The toy of claim 14, wherein said power source comprises at least one battery.

21.(original) The toy of claim 14, further comprising a microchip having an integrated circuit wherein said electrical circuit is included.

22.(original) The toy of claim 14, wherein said light source comprises a light-emitting diode.

23.(original) The toy of claim 14, wherein said switch is positioned along an exterior surface of said housing so as to aid user access thereto.

24.(original) The toy of claim 14, in combination with an amount of a scent-producing material positioned within the inner cavity of said housing so as to release scent through said outlet opening.

In re Patent Application of  
**Deutsch et al.**

---

25.(original) The toy of claim 24, wherein the scent-producing material comprises catnip.

26.(original) The toy of claim 14, further comprising a sound source connected in said electrical circuit.

27-53.(canceled)
